**The Biamonte Method
of Candida Elimination**

An effective Candida treatment program ensures that the Candida is not just *eliminated*, but also corrects underlying imbalances, deficiencies and toxicities that could allow the Candida to return if left in place.

**1 in 3 People May
Have Candida**

Parasite infections obtained by consumption of undercooked fish or meat can contribute to Candida growth by destroying healthy intestinal flora.

Gastrointestinal (GI) candidiasis

Healthy Intestinal Flora

Healthy intestinal flora prevents normal and naturally occurring colonies of Candida from developing to excess levels or overgrowth.

Vitamins and supplements may interfere with Candida treatment.

www.health-truth.com (212) 587-2330

www.health-truth.com (212) 587-2330

Giving a toxic body dozens of nutrients can cause an adverse reaction.

Vitamin supplements can cause an uncontrolled release of toxins, shocking the body, and causing some patients to become severely ill.

www.health-truth.com (212) 587-2330

Hormone imbalances predispose patients to Candida overgrowth or relapse.

Signs of hormonal problems linked to Candida

Women who notice their Candida symptoms worsen during the PMS phase of menses have hormonal problems linked to Candida.

www.health-truth.com (212) 587-2330

Signs of hormonal problems linked to Candida

Men who notice they have a drop in energy or libido since developing Candida like symptoms, have hormonal problems linked to Candida.

www.health-truth.com (212) 587-2330

Stress can cause Candida.

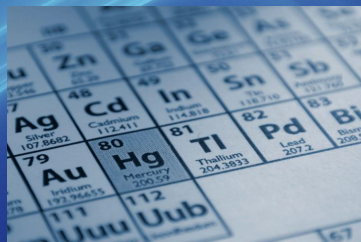

- Stress elevates the stress hormone cortisol.
- Cortisol depresses the immune system.
- Cortisol raises the amount of sugars in the mucus surrounding the Candida.

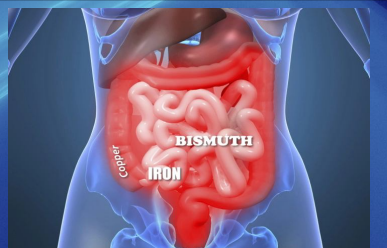

www.health-truth.com (212) 587-2330

Do not try to eliminate mercury or toxic metals while treating Candida.

www.health-truth.com (212) 587-2330

www.health-truth.com (212) 587-2330

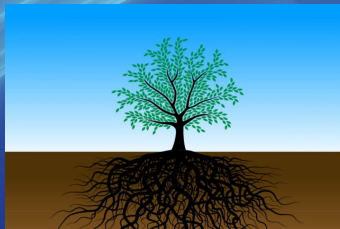

Diet alone cannot treat Candida.

Why diets alone don't work.

- Candida establishes a root system that taps into your blood vessels to feed on blood sugar and other nutrients.
- There is always enough blood sugar present to keep Candida nourished.
- Fasting can not kill Candida.

www.health-truth.com (212) 587-2330

Importance and place of diet in Candida elimination.

- Diet plans must weaken Candida so that treatments are more effective.
- Diets must consider each patient's individual needs.
- Diets must consider other health issues, such as diabetes.

www.health-truth.com (212) 587-2330

“Candida overgrowth is a tenacious condition that requires a systematic method of eradication.”

The Biamonte Method Program Phases

- Phase 1 Eliminate the Candida Infection
- Phase 2 Detoxify the Intestines and Body
- Phase 3 Correct Hormone and Nutrient Deficiencies
- Phase 4 Support and Rebuild the Immune System

www.health-truth.com (212) 587-2330

This is the solution and the correct path to handling this modern day scourge.
